luxury & convenience

A home lift from Savaria

delivers long-lasting convenience for your home, removing the barrier of stairs on every level. Whether you choose our popular Eclipse chain-drive model, or our whisper-quiet Zenith rope traction drive, your Savaria lift can be finished beautifully from our wide selection of cabin and fixture materials.

Cabin with high gloss walnut luxury MDF, stainless steel fixtures and Savaria Auto Slim doors in stainless steel.

Customise your solution

Your home is a reflection of your personal style; your Savaria home lift can be too. Create the perfect solution tailored to your unique needs and design sense, from a wide selection of model and configuration options, finishes and accessories.

Whether you are building a new home, or planning to retrofit your lift into your current home, a Savaria lift can be configured to access multiple levels and entrances to fit your floorplan. A site visit from one of our installation experts allows us to suggest the best solution for your home.

Cabin with high gloss pearl matrix luxury MDF, blackened stainless steel fixtures and clear glass door with black frame.

make it yours

Customise your lift with a choice of 12 melamines, or upgrade to luxury MDF panels.

Beauty, brawn & brains

Your Savaria home lift is built with care using reliable components to provide you with dependable performance, and to meet or exceed the strictest lift, electrical, mechanical and building safety guidelines.

Behind the beautiful exterior is one of the smartest brains around; the microprocessor driven controller is demonstrably reliable and designed for up to six stops.

Choose from two feature-packed models with options to suit virtually any configuration: the Eclipse or the Zenith lift.

Savaria Eclipse

Choose the robust Eclipse HD version for heavy-duty components, a commercial-style car sling and a larger cab size.

Savaria Zenith

Exceptional ride quality with whisper-quiet operation.

Based on our commercial-grade Meridian™ machine-roomless elevator, the robust Zenith features a unique geared rope traction drive that delivers an ultra-smooth ride quality. Requiring only a small space nearby for components, the elevator can be installed without a traditional machine room. The Zenith lift offers a high capacity of up to 635 kg.

built with care

Your Savaria home lift is manufactured by a global leader in accessibility that's been building quality lifts for 40 years. We're proud to do our best for each customer we serve.

Cabin with melamine panel and glass walls, brass fixtures and black framed glass Auto Slim doors.

luxury standards, unlimited options

Create your own personal lift from our wide selection of options. Choose from a range of cab styles and sizes, then select your finishes to complement and complete your solution. You can even have your own contractor finish your lift on site.

Choice of Cab Styles

Choose from our standard cabin or the stainless accent cabin. The standard cabin features paneled walls in standard melamine, or optional luxury MDF, glass, mirror or stainless steel. The stainless accent cab features floor to ceiling stainless steel accent panels with integrated car operating panel. Complement the accent walls with your choice of melamine.

Choose from automatic sliding or traditional doors…

Automatic Slim Doors

Add convenience and an elegant, modern appearance to your Savaria home lift with automatic slim doors. These commercial-grade doors can be used as a complete system, or in combination with a swing-style landing door. Finish in stainless steel, powder coated paint, or framed glass.

to finish your home lift perfectly.

Hinged Landing Doors

Our swing-style flush door features attractive clear or frosted glass inserts and an aluminium frame finished with durable powder coat in your choice of colour. Doors include integrated call buttons on the frame and a safety light curtain on the elevator cabin. Add an automatic opener for convenience and ease of use.

specifications

Standard specifications

- Capacity: 430 kg or 635 kg (Zenith only)
- 2 stops with up to 3048 mm of travel
- Fully automatic operation
- Running speed: 0.25 m/s
- Illuminated automatic push button operation on hall call stations; in-use indicator lights
- Digital display (floor and directional indicator) in car operating panel (COP)
- Available alpha numeric button marking
- Homing feature
- 2032 mm or 2133 mm cab height
- 19 mm melamine or unfinished MDF in standard cab or stainless accent cab with brushed stainless steel trim
- Surface-mount telephone
- 36 month limited parts warranty

Safety features

- Certified lift door locks
- Emergency battery back-up for cab lighting and lowering
- Manual lowering with hand crank (Eclipse) or emergency manual lowering device (Zenith)
- Audible "beep codes" cue user if action needs to be taken for unit to operate (e.g. close landing door)

Drive systems

- Eclipse: energy efficient variable speed 2 hp motor drive with motor brake and slack chain brake system
- Zenith: counterweight traction with slack cable safety device, geared motor 1:1 sheave, three 9.5 mm diameter steel cables (ropes), rope wedge sockets

Optional features

- Automatic slim doors available for 2133 mm or 2438 mm cab heights, in standard 749 mm and 900 mm clear opening configurations, as well as custom sizes
- Power gate and power door operators
- Digital display hall calls
- Keypad phone or phone box
- Counter-weight safety brakes (necessary when habitable space is below lift – increased overhead and/or pit depth required)
- See colour chart for details on finishes available

Additional Eclipse options

- Upgraded roller guides for a smoother ride

Configuration options

- Up to 6 stops to a maximum of 12 metres of travel
- Custom cab height up to 2438 mm (2845 mm overhead required)
- Concurrent landings/openings
- Eclipse HD: cab size of 1.6 square metres; cabs with clear width over 1067 mm and automatic slim doors have steel cab with choice of overlay panels
- Zenith: cab size up to 1372 mm wide, and capacity up to 635 kg
